

Satyam Bansal

Software Developer

New Delhi, India | +91 9039252383 | satyamsgsits1994@gmail.com

github.com/satyambnsal satyambnsal.com

Summary

- Well versed in Web3 development with JavaScript, TypeScript, Solidity, Cairo, React JS, NextJS, GraphQL, and Node JS.
- Open-source contributor in blockchain space for last three years and have contributed to Noir, Cairo, Dojo core repositories.
- Eight years of experience developing Web apps and have worked with India's largest streaming service Disney + Hotstar.
- Strong track record of open-source contributions over last five years.
- Good understanding of design patterns and Object-Oriented Programming concepts.
- Good remote work experience. Been working remotely for last 3 years.
- Long time contributor on OnlyDust
- I do deep dive tech streams on blockchain topics [here](#)

Work experience

Full Stack Developer 2024-03 - Present

Nethermind Research

- Developed zkSync remix plugin and starknet plugin that allows users to deploy smart contract from remix IDE.
- Eigenlayer restaking dashboard development for restakers, AVS operators to see relevant metrics.
- [Developed Teeception.ai](#) where autonomous Starknet agent running in TEE environment and players can challenge these agents to win rewards.

ZK Ecosystem 2023-01 - Present

OSS Contributor

- Created an on-chain strategic city development game [TileVille](#) where players develop city using hexagonal Tiles and compete with other players.

Skills

Languages

- JavaScript(ES6 syntax)
- TypeScript
- Rust
- Cairo
- Noir

Framework/Concepts

- Node JS, React JS, NextJS, Redux Express
- O1JS
- Web Services, micro-services, NATS RESTFUL APIs
- Hardhat, Ether.js, Tokio
- GraphQL
- SCSS, Tailwind

DevOps

Git, GitLab, Docker, Kubernetes, Rancher, AWS

Accomplishments

- Winner of Starknet India Hackathon
- Secured 193 rank in state engineering exam.
- Got first rank in Persistent Technothon at Nagpur centre.
- Web3 community KERNEL Block 4 fellow

- Collaborate with a team of developers to enhance the on-chain gaming framework, Dojo, through continuous contributions and improvements.
- Building [Noirlings](#), which is interactive learning platform to learn Noir from scratch.
- Contributed to Dojo, on-chain gaming framework and have received multiple bounties for my contribution.
- Have Contributed to O1JS core Github repositories.
- I've been doing deep tech streams on All things ZK. purpose of these streams is to help understand concepts of ZK chains.

Blockchain Developer 2022-01 - 2022-12

Passage Protocol (US Based, Remote)

Developing no-code solution that allows NFT and DAO communities to deploy dynamic membership projects keeping members data across different on-chains. Tech stack: NextJS, Typescript, Hardhat, Solidity, EtherJS, Graph protocol.

Senior Software Engineer 2020-06 - 2022-01

Turing (US Based, Remote)

- Developed Turing workspace modules for both Web and Electron app that allows users to manage reviews, track tasks, etc.
- Created backend micro-services for event tracking via sentry and sending slack notification in case of severe events.

Senior Software Engineer 2018-04 - 2020-05

[Disney + Hotstar](#)

- Developed the subscription module that allows users to purchase Hotstar subscriptions for all supported countries via various payment methods and coupons.
- Created Phone number login UI for Hotstar Website.
- Added country support to Hotstar Website to launch it in the new market.
- Created CI/CD process for effective deployment and automatic scaling using GoCD and Kubernetes.

Software Engineer 2016-09 - 2018-04

Persistent Systems

- Worked as a software developer to develop applications in Node JS and React JS.
- Worked on front-end technologies like HTML, CSS, React JS to develop single-page applications.
- Worked on version control tools like git and svn.

Education

Bachelor of Engineering 2012-05 - 2016-06
Shri G.S. Institute of Technology and Science
Graduated in Information Technology with CGPA 6.93

Projects

1. MinaPolis: On-chain arcade city development game built on MINA
2. StarkVoice: Decentralise Voting System on Starknet
3. Cairo Contracts: Collection of most commonly used cairo contracts
